

Comprehensive Textile Sewing Solutions

Industrial Sewing, Product Development, and Nonwoven Filtration

Fairway Products' industrial sewing capabilities provide us with a quality-oriented and cost-efficient background to manufacture products to our customers' specifications. Along with our industrial sewing services, we can also provide product development and engineering skills to work with woven and non-woven fabrics, vinyl, foam, laminates, leather, and more. Our contract industrial sewing services can help you grow your ideas into a prototype, and we can support anything from small runs to mass production runs.

Because of their unusually high wet strength, light weight, good chemical resistance and low cost, nonwovens are outstanding for many filtering applications. We not only specialize in nonwovens for coolant filtration and offer a complete range of densities and micron ranges, but we are also able to cut and sew filter pouches, socks, tubes, and bags out of woven and nonwoven filter fabric.

An experience engineer can help you choose the optimal material, and our inhouse converting plants will ensure a quick turnaround and affordable pricing.

The Power of Fairway

Fairway Products is committed to providing high-quality industrial sewing services that meet the rigorous standards of our diverse clientele. Our experienced team, state-of-the-art equipment, and dedication to excellence ensure that every project is completed to the highest specifications.

Applications

SEATING & SEAT COVERS

Seat covers, headrests, and other interior components.

FILTRATION

Air filtration systems, Needle & Thread debris filters, Lint traps, vacuum systems, water filtration systems

MEDICAL & HYGIENE

Surgical covers, patient positioning devices, and protective gear.

OUTDOOR STORAGE COVERS & BAGS

Tarpaulins, storage bags, fabric covers, storage covers, storage totes

Features

- ★ **Contract Sewing:** Custom sewing projects executed with precision and efficiency.
- ★ **Cut and Sew Operations:** Combining cutting-edge technology with skilled craftsmanship to produce superior products.
- ★ **Assembly Services:** Integrating multiple components to create complete, functional items.

Benefits

- ✓ Quality-oriented and cost-efficient manufacturing
- ✓ Expertise in woven and non-woven fabrics
- ✓ Ability to handle small and large jobs
- ✓ Experienced engineering support
- ✓ Quick turnaround and affordable pricing
- ✓ Large stock of fabrics for prompt delivery
- ✓ Over 65 years of industrial sewing experience
- ✓ Expertise in industrial and food grade non-woven and woven fabrics for air and liquid filtration

Sewing Capabilities

Single Needle

Double Needle

Walking Foot and Needle Feed

Materials & Equipment

Specifications

- ⚙ Cylinder Arm
- ⚙ Programmable Sewing
- ⚙ Capable of sewing heavy textiles
- ⚙ Array of custom attachments for Folding and Binding
- ⚙ Serging
- ⚙ Tubing
- ⚙ Juki and Mitsubishi Machines
- ⚙ Needle feed to heavy duty walking feet
- ⚙ Zig zag capabilities

Materials

- ⚙ Heavy duty textiles such as leather, vinyl, felt, non-wovens, light plastics
- ⚙ Complex shapes and patterns
- ⚙ Repeatable sew patterns
